

HOME ENERGY SAVING PACK

Pack Contents

-  **Energy Performance Report -**
This report lets us see how energy efficient your home currently is, this allows us to model products as if they were fitted to see how they impact your homes efficiency.
-  **Recommendations -**
Using the energy report, RdSAP software plus taking into account the condition report and ventilation report we give specific recommendations of the best products for you to fit that best impact your energy efficiency.
-  **Condition Report & Ventilation Report -**
This is a Retrofit assessment under PAS2035 standards, this assess the condition of your property making sure measures we are suggesting are suitable for the building highlighting any repairs which should be done. The ventilation report ensures there will be adequate ventilation once the measures suggested are fitted along with recommended works need if any.
-  **Grant Assessment & Quotes -**
We are involved and have access to various Government grants, as part of this pack we assess eligibility to see if any products can be part or fully funded. We work with many different contactors and as a result any products we cannot obtain grants for we are able to offer quotes for the work, your able to also instruct us on these quotes to have the works carried out
-  **Post Energy Performance Report -**
This is the same as the initial energy report but shows what impact the products have made to the energy efficiency of your home. (if the recommended works were fitted)
